

H. Peter Soyer

The University of Queensland

Prof H. Peter Soyer, a Fellow of the Australian Academy of Health & Medical Sciences, is one of the world's most highly regarded and innovative academic dermatologist and dermatopathologist. His research focus is skin cancer and melanoma with special focus in technological innovations and integration of AI into dermatology.

He is the Inaugural Chair in Dermatology at The University of Queensland, Director of the Dermatology Research Centre at the Frazer Institute (until 2024) and was Director of the Dermatology Department, at Princess Alexandra Hospital in Brisbane from 2008 to 2023. He co-led the development of the dermoscopy classification system which is now used worldwide; he co-founded and presided over the International Dermoscopy Society.

In 2018, he was awarded a \$9.9M infrastructure grant by the Australian Cancer Research Foundation to establish and lead the Australian Centre of Excellence in Melanoma Imaging and Diagnosis (ACEMID). He has 860 publications with a total citation count is 29,741 and an all-of-career h-index of 80 (Scopus, May 2026).
